IMPORTANT INFORMATION

Revised Lead and Copper Rule

Lead and Copper Rule Revisions Service Line Inventory Guidance

This is mandatory, the dead line is approaching

If I have received your PHOTO from the previously sent letters, you can disregard this final notice, if photos are not included, they will not be accepted.

***** For non-compliance, it will be assumed lead and require replacement**

Per NYS and the new revised lead and copper rules in place we must begin the inventory of water supply lines. We would like to allow the residents a month's opportunity to provide us a clear quality picture of the service line where it attaches to the meter, coming into the home.

These photos should include approximate size of the line, meter and ERT (if visible write the meter and ert number) A scratch test should also be performed roughly 6 inches before the meter. A scratch test is done with a blade, knife, etc. to remove debris and expose base metal.

*If you are unable to provide this information, or have questions/concerns, please call Water Department Supervisor, Meghan Fox at 607-742-4915 and we can gladly set up a time, free of charge to get the pictures and information needed to follow these revisions.

*** This includes all residents, business's, rentals and abandoned/empty properties

Submit any information to watersuper@watkinsglen.us or via text 607-742-4915, along with your name and address

We apologize for any inconvenience

We appreciate you Cooperation

Respectfully,

Water Department Supervisor

Meghan Fox
